To Whom It May Concern:

As an emerging and science-based company in Indian aquaculture sector, our philosophy at Coastal Feeds always has been providing well Researched, scientifically validated and Pond proven products and formulations to Indian Farmers and Aquaculture industry.

In our quest to bring world class products to Indian farmers without hefty "International" price tag, we naturally forged partnership with Aquaintech Inc. and its CEO Mr. Stephen Newman, Ph.D.

When we contacted many worldwide companies to bring their products to India, we ended up talking with sales/marketing persons who do not know much about the product except marketing material talking points given to them.

In case of Aquaintech Inc. we were able to speak with President/CEO Mr. Stephen Newman himself, more importantly we found he is genuinely interested in aquaculture and still spends considerable time at ponds, hatcheries, and feed mills across globe. With his Ph.D. degree and 38 years of experience in aquaculture of many species across globe, he was able explain us so many things and also guided us to genuine products.

We are happy to announce Mr. Stephen Newman, Ph.D and Aquaintech Inc. will be our partners in our future products ,formulations and on our quest to benefit Indian aquaculture farmers and Industry with latest research and science based products.

Regards,

  
Kiran Katragadda

Vice President
